Claims 1-37 are pending in this application.

DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3, 12-19 and 31-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dubief et al. (US 6,375,939 B1).

Dubief et al. (US' 939 B1) teaches a method for treating hair comprising applying to the hair a composition that may be formulated as a hair dyeing composition or a shampoo composition as claimed in claims 15-16 (see col. 9, lines 1-2 and line 28) wherein the composition comprises cadmium sulfide and Selenium sulfide as claimed in claims 1-3 and 18-19 (see col. 6, lines 15-17). The composition further comprises surfactants as claimed in claim 33 (see col. 9, lines 6-9).

The instant claims differ from the reference by reciting luminescent semiconductive nanoparticle capable of emitting under the action of a light excitation, radiation with a wavelength ranging from 400 to 700 nm. The reference also does not teach the diameters of the nanoparticle as claimed.

However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to formulate a composition for dyeing hair that comprises luminescent semiconductive nanoparticle for emitting radiation with a wavelength ranging from 400 nm to

700 nm and having the claimed particle diameters because the reference teaches a composition comprising cadmium sulfide and Selenium sulfite (see col. 6, lines 15-17) that are capable of emitting radiation similar to the claimed wavelength and having similar diameters and, thus a person of the ordinary skill in the art would expect such a composition to have physical properties similar to those claimed, absent unexpected results.

Allowable Subject Matter

2. Claims 4-11 and 20-30 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art of record do not teach or disclose a method for dyeing or a dyeing composition comprising at least one luminescent semiconductive nanoparticle comprising a core a shell that covered the core as claimed.

Conclusion

The remaining references listed on from 1449 have been reviewed by the examiner and are considered to be cumulative to or less material than the prior art references relied upon in the rejection above.
